

**MARCIN JUCHNIEWICZ**

Function: Director and Ichthyologist in "Fish Farm K2", consultant in "Aller Aqua Polska"

Session: Chemical, Biological and Medicine Residues in Unprocessed Food

TOUR Stop: Warsaw/Poland, 14-15 September 2011

Profile

In 2003 I have completed aquaculture faculty at the dpt. of environmental protection & inland fishery of Warmia & Mazury University In Olsztyn. In 2010 I have graduated from MBA program at University of Gdansk with project defended – „Development of self-assessment model of trout farms according to GLOBALG.A.P requirements”. On a professional base I have been familiar with aquaculture sector from 2004, where I worked at the company producing fish feed „Aller Aqua” In Denmark in R&D dpt. Starting from 2005 I have been working within family business – „Fish farm K2” near city of Lebork as the managing director & ichthyologist responsible for purchases, sales, operational & financial controlling, implementation and maintenance of GMP, GHP and GLOBALG.A.P. Since 2006 I have been also working as a trout farming consultant in the company “Aller Aqua Polska” which manufactures fish feed. Moreover in 2006 I was part of the project of first implementation of ISO 9001 & 14001 amongst polish fish farms into „Wylegarnia ryb Dabie” near Bytow. The farm is bearing now the certificate of fulfilling the requirements according to ISO 9001 & 14001 standard. At the end of 2007 I have participated in the aquaculture development project in Madagascar as the consultant, exploring the possibilities of implementation of efficient methods of trout farming there.
